

Invitation for all, interested in problems and struggle of refugees

Dear refugees and friends of the refugees,
we would like to invite you to a film-evening with discussion:

B OZA - a film about refugees` experiences on their way to Europe (with German subtitles) - When? 10.09.15 at 7 pm - Where? In Freiburg, meet us in front of the BEA, Lörracherstraße and from there to the SUSI-Café in Vauban

„BOZA“ is a word in the western African language Bambara and means „victory“. „BOZA“ shout the migrants from countries of the south of Sahara, when ,after years of vain attempts, they finally achieve to overcome borders and walls of Europe.

The film reveals the brutal effects of Europe’s forced and financed border regime in Maghreb and bad living conditions of migrants hiding in Moroccan forests near the Spanish colonies of Ceuta and Melilla. Getting over the six meter high fence with barbed wire has produced a lot of seriously injured and dead refugees. Also at the Tunisian-Libyan border hundreds of refugees are waiting in a camp in the Tunisian desert for admission in a secure European country.

But once arrived in Europe, the Odysee is not at its end. Refugees and migrants have to fight against a racist system of asylum, locked up in isolated camps without a perspective for years. The Tunisian director of film Walid Fellah accompanied refugees on their clandestine journey and build the bridge to the struggle of refugees in Europe. He, together with members of “Refugee 4 change,” took part in the march for freedom from Strasbourg to Brussels in summer 2014 against the racist migration and border politics of Europe.

In contrast to most films about the border regime directed by Europeans, “BOZA” emphasizes the perspective of refugees and migrants, who do not accept the borders between Europe and none Europe.

After the movie there will be discussion with an activist of „Refugees for change“
